

ESP32-CAM-MB MICRO USB Download Module for ESP32 CAM Development Board

The ESP32-CAM-MB programmer is a shield that you attach to your ESP32-CAM board GPIOs. The programmer comes with the CH340C USB to serial chip. This allows you to program the ESP32-CAM using the USB port on the shield. The shield also comes with a RESET button. This may be useful to easily reset the ESP32-CAM or put it into flashing mode.

Features

- Model: ESP32-CAM-MB
- Chipset: CH340G
- WiFi Image Upload is supported.
- support a variety of sleep settings.
- Encourage secondary growth.
